

TORNOS

*The solution that evolves
with your business strategy*

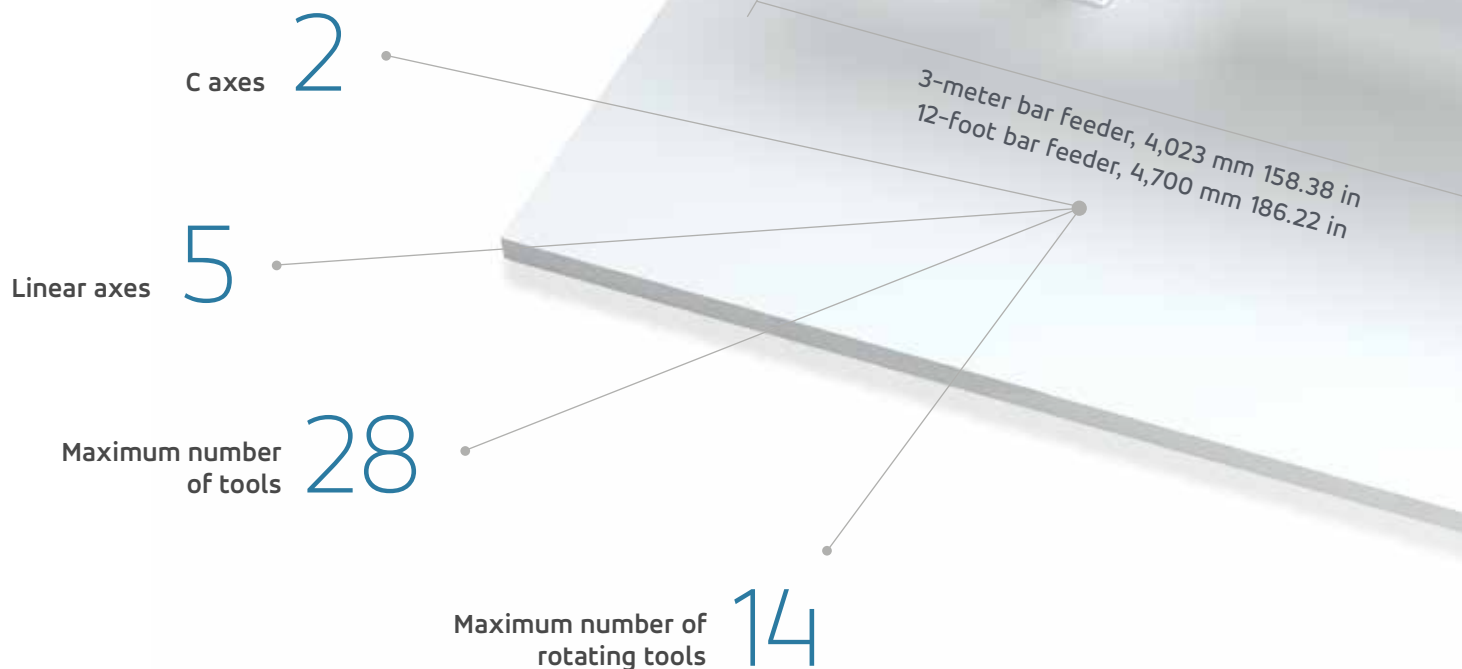

Swiss DT range

The solution that evolves with your business strategy

Customized for your productivity

Maximize your productivity: The machine's base was designed for just that purpose. This fully modular machining area can accommodate any type of tool holder; drilling, milling, thread whirling or even gear hobbing are just a few examples of the Swiss DT's incredible flexibility.

Power your profitability

Gain precious seconds to outperform your competitors and tackle any material, due to the Swiss DT's extremely powerful spindles. Equipped with **ceramic bearings**, the 2 spindles benefit from the same **10.5 kW power***. Able to accelerate to 10,000 rpm in 0.3 seconds*, our spindle lets you benefit from **26 Nm (19.177 ft./lb.)*** of torque. Both spindles are liquid-cooled.

Tailored for you

Confidently conquer any machining challenge with Tornos' Swiss DT range, built for you and adapted to your needs. Get the agility to master any challenge, with the **plug-and-play B axis (option)**.

Enjoy the benefits of the most rigid machine in its class

Achieve better surface finishes and longer tool life, and get a quick return on your investment, thanks to this machine's sturdy, cast-iron base optimized by finite element analysis. The Swiss DT range can also accommodate water-based coolant.

Improve and ensure self-sufficiency with Tornos' Active Chip Breaker Plus (ACB Plus) software

Improve and secure the autonomy of your process (option).

* Swiss DT 26 HP

Introducing the new Swiss DT range

Built on heritage since 1891

Swiss DT 13 HP
Swiss DT 13 S

Swiss DT 26 HP
Swiss DT 26 S

The image shows two Tornos Swiss DT lathes, one labeled 'Swiss DT 13 HP / Swiss DT 13 S' and the other 'Swiss DT 26 HP / Swiss DT 26 S'. They are positioned on a white platform against a dark background. A large, glowing yellow arc curves around the machines, highlighting the 'Swiss DT' range. The machines are white and black, with 'TORNOS' branding visible.

Spindle power (S1/S6)	kW
Counter spindle power (S1/S6)	kW
Direct-drive guide bush	

Meet your new partner: the latest-generation Swiss DT range. Exceed your own expectations, extend your competitive edge, and profit from a solution that evolves according to your business strategy.

The range consists of 6 S and HP machine configurations accommodating 13, 26, 32, and 38 mm diameter bars.

Swiss DT 32 HP

Swiss DT 38 HP

Swiss DT 13 HP	Swiss DT 13 S	Swiss DT 26 HP	Swiss DT 26 S	Swiss DT 32 HP	Swiss DT 38 HP

Increase your flexibility tenfold

1

Up to 5 tools

Configuration 1

- 5 turning tools (12x12 mm / 1/2x1/2 in)*
- 5 ESX20 drilling/milling spindles
- Support block for 4 fixed tools or support block for 5 fixed tools
- Up to 5 tools in counter-operation

2

Up to 5 tools

1 triple drilling/ milling unit

Configuration 2

- 5 turning tools (12x12 mm / 1/2x1/2 in)*
- 4 ESX20 drilling/milling spindles
- 1 triple drilling/milling unit
- Support block for 4 fixed tools
- Up to 5 tools in counter-operation

3

Up to 5 tools

High-torque rotating drilling/milling spindle

Configuration 3

- 5 turning tools (12x12 mm / 1/2x1/2 in)*
- 6 ESX20 drilling/milling spindles or 4 ESX20 drilling/milling spindles and 1 high torque rotating drilling/milling spindle (ESX20 + ESX11)
- Up to 5 tools in counter-operation

Facing difficult material?

Try out our high torque rotating drilling/milling spindle (ref. XXX-1644) with double the torque available!

Configure your future

4

Up to 5 tools

1 triple angular drilling/milling unit

Configuration 4

- 5 turning tools (12x12 mm / 1/2x1/2 in)*
- 4 ESX20 drilling/milling spindles
- 1 triple angular drilling/milling unit
- Up to 5 tools in counter-operation

* Optional, and with the removal of one ESX20 drilling/milling spindle, the machine can be configured with six turning tool holders (12 x 12 mm / 1/2 x 1/2 in) or five turning tool holders (16 x 16 mm / 5/8 x 5/8 in).

Configuration 5

- 5 turning tools (16x16 mm / 0.63x0.63 in)*
- 4 ESX20 drilling/milling spindles
- Thread-whirling unit
- Up to 5 tools in counter-operation

Configuration 6

- 5 turning tools (12x12 mm / 1/2x1/2 in)*
- 3 ESX20 drilling/milling spindles
- Gear-hobbing unit
- Up to 5 tools in counter-operation

Configuration 7

- 5 turning tools (12x12 mm / 1/2x1/2 in)*
- 4 ESX20 drilling/milling spindles
- Polygon milling unit
- Up to 5 tools in counter-operation

* Optional, and with the removal of one ESX20 drilling/ milling spindle, the machine can be configured with 6 turning tool holders (12 x 12 mm / 1/2 x 1/2 in) or 5 turning tool holders (16 x 16 mm / 5/8 x 5/8 in).

Plug-and-play B axis

Configuration 8

- 5 turning tools (16x16 mm / 0.63x0.63 in)*
- 3 ESX20 drilling/milling spindles
- Up to 5 tools in counter-operation
- Plug and play B-axis, with 2x3 ESX11 drilling/milling spindles + 1 additional drilling/milling spindle for B axis, ESX8 or 1 high-frequency spindle

Up to 5 tools

Plug-and-play B axis, with 2x3 ESX11 drilling/milling spindles + 1 additional drilling/milling spindle for B axis, ESX8 or 1 high-frequency spindle

Configuration 9

- 5 turning tools (16x16 mm / 0.63x0.63 in)*
- 2 ESX20 drilling/milling spindles
- Support block for 4 fixed tools
- Up to 5 tools in counter-operation
- Plug and play B-axis, with 2x3 ESX11 drilling/milling spindles + 1 additional drilling/milling spindle for B axis, ESX8 or 1 high-frequency spindle

Up to 5 tools

Plug-and-play B axis, with 2x3 ESX11 drilling/milling spindles + 1 additional drilling/milling spindle for B-axis, ESX8 or 1 high-frequency spindle

Plug and play B-axis

Number of rotating tool positions (main operation / counter-operation)		3 / 3 (4 / 4 option)
High-frequency spindle		1 (option)
Rotating tool speed of rotation	rpm	8,000
Rotating tool power	kW/hp	1.0 / 1.33
Max drilling diameter	mm/in	Ø5.2 / Ø0.20
Max tapping diameter		M3X0.5

Ultra-stable rigid design.
The machine is supported on 3 feet.

Modular machining area

14 rotating tool positions

32 m/min feed rate

Liquid-cooled
spindle, up to
10,000 rpm

Reliable and durable

Large capacity chip
tank, chip basket
and filters

High rigidity

The most rigid machine base in its class

Options

Active Chip Breaker Plus (ACB Plus)

Extremely easy to use and can be actuated by just inserting a G code in the program. Various parameters can be used to change the oscillation amplitude and frequency to achieve a fine adjustment based on the specific workpiece requirements and thus avoid snarl chips.

B axis

The B axis extends the Swiss DT's capabilities substantially, allowing it to tackle almost any part. This modular position can incorporate either a 4th rotating drilling station or a high frequency spindle.

High-pressure pump

Benefit from a high-pressure-ready machine, and defeat the most difficult challenges with the Swiss DT! Whether you need a significant amount of coolant to "clean" the machining area, or more direct high-pressure coolant for thread whirling or high-pressure drilling, Tornos offers a range of pumps tailored to your requirements.

High-frequency spindles

High-frequency spindles, with rotation speeds of up to 60,000 rpm, enable the Swiss DT to perform drilling milling and slitting as well as eccentric drilling. Spindles can be installed in main operation and counter-operation in many variants.

Built-in part extraction

Long parts? Extract parts up to 500 mm, thanks to our optional long parts extraction system!

TISIS: Communicate with your machine

Programming

Able to manage up to 3 channels, the ISO editor automatically synchronizes the code between the channels. Programming your machine becomes very easy. You can see in real time the tool displacement and the cycle time of each operation. Furthermore you can easily optimize your program thanks to the patented Gant diagram provided by TISIS.

Selecting your tools

The TISIS database contains all of the tool resources; for example chisel holder plates, thread whirling tools, polygon tools or milling tools are all integrated. TISIS manages incompatibilities between the various tools and the user is guided intuitively.

Transfer

Transfer virtual programs to your bank of machines. Modify the program on the machine and transfer it again to your computer, maintaining full traceability.

Monitoring

Monitor your machine inventory in detail. See the status of the machines in the workshop and an overview of current production; the workpiece counter, remaining production time and the name and drawing of the workpiece are available at any time.
